

## 2026 Annual Flower Catalog

This catalog represents the annual flowers and bedding plants that we will have in stock for the 2026 growing season. We produce our flowering plants by two methods: starting them from seed at the nursery, or from plugs (baby plants), which are usually patented varieties that can not be produced by seed.

At Sweetwater Garden, we classify most plants by the "thriller, filler, spiller" method, a planting technique that uses three types of plants to create a balanced and visually appealing pot. A "thriller" is a tall, eye-catching plant placed in the center or back, a "filler" is a mounded plant that fills the middle space around the thriller, and a "spiller" is a trailing plant that drapes over the edge of the container. This method will create a full arrangement for planters and hanging baskets.

**Note: Some varieties have limited availability and sale out quickly.**

### Full Sun:

Plants that require a minimum of 6 hours of direct sunlight

### Part Sun:

Plants that require 4- 6 hours of direct sunlight per day. Morning sun is best

### Full Shade:

Plants that require less than 4 hours of direct sunlight. Morning sun is best

Varieties that provide nectar and pollen to pollinators

Varieties often provide nectar on which butterflies feed

Varieties with nectar-rich blooms that attract hummingbirds

Cut flower

Deer Resistant

Rabbit resistant

Drought tolerant

Moderate moisture

Consistent moisture (not boggy)
